

SYRTOS (Greek)

This is one of the most popular of all Greek dances and is danced endlessly at all Greek festivals. This is a line dance in W-position. The leader may execute a number of variations, but most of these are done ONLY by the leader. In order to keep on the right step, if you want to watch someone, don't watch the leader or the second person in line, as the second person may be supporting the weight of the leader. The tempo is consistently: SQQ.
